Introduction:

ESTS has developed a “Custom Contact Form” extension the contact form is a basic extension that helps to admin find customers sent request and inquiries in easy way.

This extension adds more functionality to the contact form, such as advanced notifications for all incoming contacts. Contact form is an inbuilt functionality of Magento, but with this extension, that process becomes easy and the admin can easily manage their customer's messages in one place in the admin grid.

Also, the Magento default contact form we have added some custom fields regarding the departments that will help to customer's choose their opinion of the contact to admin.

Features:

Back office features:

- ✓ Custom Contact Form for Magento 2 extension helps to manage customers messages.
- ✓ Admin can see all messages in one grid.
- ✓ It also sends email to admin with messages.
- ✓ Admin can check customers email and read their feedback on their gmail .
- ✓ Admin can set Status of an message read or pending.

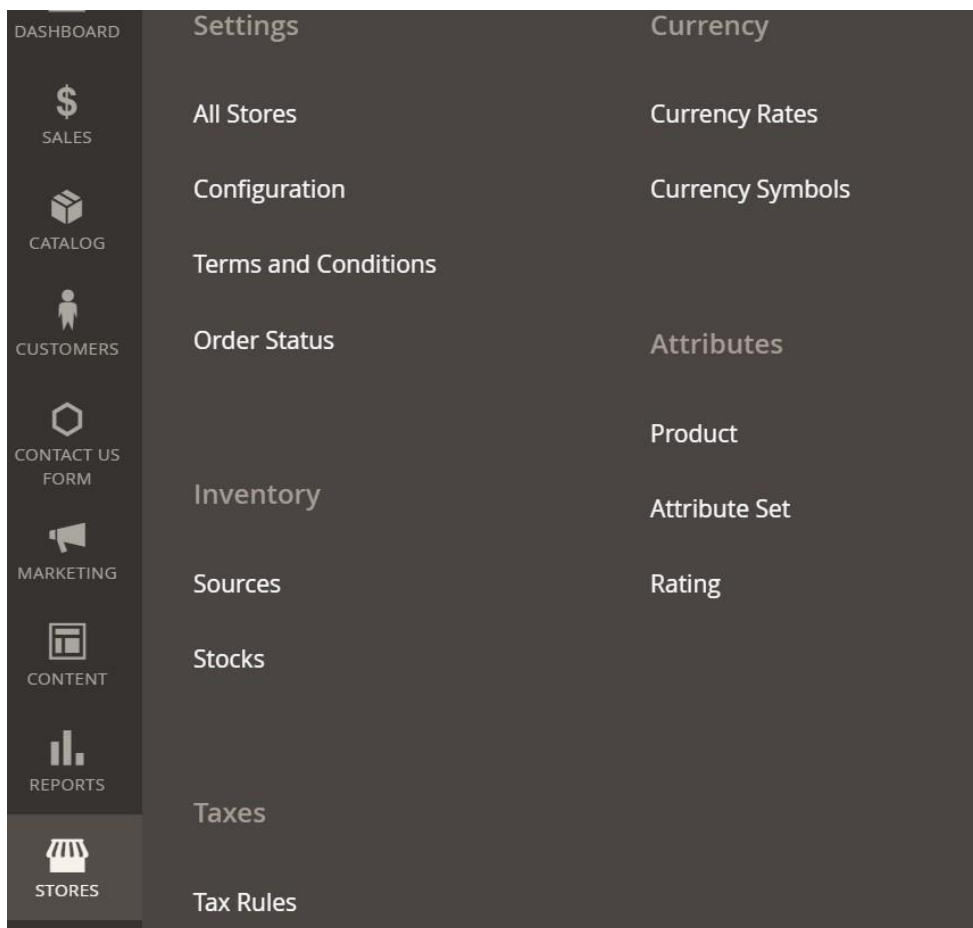

Admins can easily configure the this module on their store.
